Contents of Volume 65

No. 1. JULY 1988

Exercise-induced muscle damage, repair, and adaptation in humans
P. M. Clarkson and I. Tremblay 1

Tube law for the intrapulmonary airway
D. Elad, R. D. Kamm, and A. H. Shapiro 7

Mathematical simulation of forced expiration
D. Elad, R. D. Kamm, and A. H. Shapiro 14

Pulmonary effects of acute prenatal asphyxia in ventilated premature lambs
D. Berry, A. Jobe, M. Ikegami, S. Seidner, A. Pettenazzo, and T. Elkady 26

Venous occlusion pressure and vascular permeability in the dog lung after air embolization
J. E. Hall, W. F. Hofman, and I. C. Ehrhart 34

Single-breath $D_{L_{CO}}$ maneuver causes cardiac output to fall during and after cycling
D. S. Miles, R. W. Gotschall, M. R. Motta, and C. A. Duncan 41

Effect of alveolar hypoxia on pulmonary fluid filtration in in situ dog lungs
L. A. Homik, Z. Bshouty, R. B. Light, and M. Younes 46

Comparison of doubly labeled water with respirometry at low- and high-activity levels
K. R. Westerterp, F. Brouns, W. H. M. Saris, and F. Ten Hoor 53

Airway smooth muscle responsiveness from dogs with airway hyperresponsiveness after O_3 inhalation
G. L. Jones, P. M. O'Byrne, M. Pashley, R. Serio, J. Jury, C. G. Lane, and E. E. Daniel 57

Thermoregulatory responses of middle-aged and young men during dry-heat acclimation
K. B. Pandolf, B. S. Cadarette, M. N. Sawka, A. J. Young, R. P. Francesconi, and R. R. Gonzalez 65

Inhibition of breathing associated with gallbladder stimulation in dogs
G. T. Ford, D. A. Grant, K. S. Rideout, J. S. Davison, and W. A. Whitelaw 72

Selective lung leukosequestration after complement activation
J. M. Klausner, L. Kobzik, C. R. Valeri, D. Shepro, and H. B. Hechtman 80

Relationship between numbers and frequencies of stimuli in human muscle fatigue
S. J. Garland, S. H. Garner, and A. J. McComas 89

Synergistic hormonal effects on lung maturation in fetal sheep
J.-C. Schellenberg, G. C. Liggins, M. Manzai, J. A. Kitterman, and C. C. H. Lee 94

Pulmonary function in young and older athletes and untrained men
J. M. Hagberg, J. E. Yerg II, and D. R. Seals 101

Strenuous exercise causes systemic endotoxemia
A. T. Bosenberg, J. G. Brock-Utne, S. L. Gaffin, M. T. B. Wells, and G. T. W. Blake 106

Reflex mechanisms for changes in renal nerve activity during positive end-expiratory pressure
M. Aibiki, S. Koyama, K. Ogli, and Y. Shirakawa 109

Cardiovascular and hormonal responses to swimming and running in the rat
D. Geenen, P. Buttrick, and J. Scheuer 116

Effects of pulsed electromagnetic fields on Na^+ fluxes across stripped rabbit colon epithelium
C. S. Collis and M. B. Segal 124

Breathing response to lung congestion with and without left heart distension
T. C. Lloyd, Jr. 131

Surfactant therapy of newborn rabbits impairs lung macrophage bactericidal activity
M. P. Sherman, J. B. D'Ambola, E. E. Aeberhard, and C. T. Barrett 137

Pendelluft and mixing in a single bifurcation lung model during high-frequency oscillation
J. S. Ultman, R. G. Shaw, D. C. Fabiano, and K. A. Cooke 146

Effects of emboli, positive-pressure ventilation, and airway water on lung water measurements
W. H. Noble and J. C. Kay 156

Fever and regional blood flows in wethers and parturient ewes
C. M. Blatteis, J. R. S. Hales, A. A. Fawcett, and T. A. Mashburn, Jr. 165

Effect of the exercise-induced increase in glucocorticoids on endurance in the rat
T. L. Sellers, A. W. Jaussi, H. T. Yang, R. W. Heninger, and W. W. Winder 173

Chemical and mechanical determinants of apnea during high-frequency ventilation
S. L. Thompson-Gorman, R. S. Fitzgerald, and W. Mitzner 179

Improved postischemic recovery of cardiac pump function in exercised trained diabetic rats
D. J. Paulson, S. J. Kopp, D. G. Peace, and J. P. Tow 187

Hypoxia-induced enhancement of nonspecific bronchial reactivity: role of leukotrienes
J. D'Brot and T. Ahmed 194

Relationships among airway reactivity, pupillary α-adrenergic and cholinergic responsiveness, and age
P. B. Davis and P. J. Byard 200

Interaction between upper airway negative pressure pulses and CO_2 on breathing pattern
D. L. Woodall and O. P. Mathew 205

Upper airway pressure receptors alter expiratory muscle EMG and motor unit firing
E. van Lunteren, N. S. Cherniack, and T. E. Dick 210

Altered angiotensin-converting enzyme in lung and extrapulmonary tissues of hypoxia-adapted rats
S. Oparil, A. J. Narkates, R. Jackson, and H. S. Ann 218

Neutrophils in reexpansion pulmonary edema
R. M. Jackson, C. F. Veal, C. B. Alexander, A. L. Brannen, and J. D. Fulmer 228

Superoxide dismutase and cytochrome oxidase in collapsed lungs: possible role in reexpansion edema
R. M. Jackson, A. L. Brannen, C. F. Veal, and J. D. Fulmer 235

Effects of amiloride and diethyl pyrocarbonate on CSF HCO_3^- and ventilation in hypercapnia
E. E. Nattie and B. Giddings 242

Ventilatory failure during loaded breathing: the role of central neural drive
J. F. Watchko, T. A. Standaert, D. E. Mayock, G. Twiggs, and D. E. Woodrum 249

Physiological and biochemical correlates of increased work in trained iron-deficient rats
W. T. Willis, P. R. Dallman, and G. A. Brooks 256

Measurement of airway mucosal perfusion and water volume with an inert soluble gas
A. Wanner, J. A. Barker, W. M. Long, A. T. Marriassy, and A. D. Chediak 264

Modification of bronchial blood flow during allergic airway responses
W. M. Long, L. D. Yerger, H. Martinez, E. Codias, C. L. Sprung, W. M. Abraham, and A. Wanner 272

Microvascular pressures during hypoxia in isolated lungs of newborn rabbits
C. D. Fike, S. J. Lai-Fook, and R. D. Bland 283

Diameter and flow velocity changes in small pulmonary vessels due to microembolization
M. Shirai, K. Sada, and I. Ninomiya 288

Adenosine transport by the lung
D. K. Das and H. Steinberg 297

CONTENTS OF VOLUME 65

Accuracy of respiratory inductive plethysmographic cross-sectional areas
H. L. Watson, D. A. Poole, and M. A. Sackner 306

Variability of resting respiratory drive and timing in healthy subjects
M. J. Tobin, M. J. Mador, S. M. Guenther, R. F. Lodato, and M. A. Sackner 309

Shift in body fluid compartments after dehydration in humans
H. Nose, G. W. Mack, X. Shi, and E. R. Nadel 318

Role of osmolality and plasma volume during rehydration in humans
H. Nose, G. W. Mack, X. Shi, and E. R. Nadel 325

Involvement of sodium retention hormones during rehydration in humans
H. Nose, G. W. Mack, X. Shi, and E. R. Nadel 332

Indirect estimate of perimicrovascular pressure rise in edema in isolated zone 1 lung
T. Tanita, M. Onizuka, and N. C. Staub 337

Filtration profile in isolated zone 1 and zone 3 dog lungs at constant high alveolar pressure
M. A. Gropper, J. Bhattacharya, and N. C. Staub 343

Divergent effects of silica on lymphocyte proliferation and immunoglobulin production
P. L. Moseley, M. Monick, and G. W. Hunninghake 350

Endotoxin causes neutrophil-independent oxidative stress in rats
S.-W. Chang, B. H. Lauterburg, and N. F. Voelkel 358

Sustained inflation during HFOV improves pulmonary mechanics and oxygenation
M. C. Walsh and W. A. Carlo 368

Adaptation of bone and tendon to prolonged hindlimb suspension in rats
A. C. Vailas, D. M. Deluna, L. L. Lewis, S. L. Curwin, R. R. Roy, and E. K. Alford 373

Selective effect of phorbol ester on serotonin removal and ACE activity in rabbit lungs
C. L. Myers and B. R. Pitt 377

Influences of superior laryngeal afferent stimulation on expiratory activity in cats
F. Bongianni, M. Corda, G. Fontana, and T. Pantaleo 385

Extrathoracic and intrathoracic removal of O_3 in tidal-breathing humans
T. R. Gerrity, R. A. Weaver, J. Berntsen, D. E. House, and J. J. O'Neil 393

Effect of epinephrine on neutrophil kinetics in rabbit lungs
C. M. Doerschuk, M. F. Allard, S. Lee, M. L. Brumwell, and J. C. Hogg 401

Interrupter resistance elucidated by alveolar pressure measurement in open-chest normal dogs
J. H. T. Bates, M. S. Ludwig, P. D. Sly, K. Brown, J. G. Martin, and J. J. Fredberg 408

Lung inflation does not increase maximal expiratory flow during induced obstruction in the dog
M. S. Ludwig, J. J. McNamara, R. G. Castile, G. M. Glass, J. J. Fredberg, and R. H. Ingram, Jr. 415

Effects of acetazolamide on cerebral acid-base balance
P. E. Bickler, L. Litt, D. L. Banville, and J. W. Severinghaus 422

Effects of acetazolamide on cerebrocortical NADH and blood volume
P. E. Bickler, L. Litt, and J. W. Severinghaus 428

Sympathetic neural influences on muscle blood flow in rats during submaximal exercise
D. F. Peterson, R. B. Armstrong, and M. H. Laughlin 434

Development of stability of the respiratory system in preterm infants
G. P. Heldt 441

Rapid increase in mast cell numbers in canine central and peripheral airways
C. R. Turner, J. Kolbe, and E. W. Spannhake 445

Mechanics of parasternals and triangularis sterni in upright vs. supine dogs
V. Ninane and A. De Troyer 452

MODELING METHODOLOGY FORUM

Computer model of fetal-maternal heat exchange in sheep
H. Schröder, R. D. Gilbert, and G. G. Power 460

SPECIAL COMMUNICATIONS

Automated temperature control system for vagal cooling
E. J. Cha, E. Chow, D. M. Vega, and S. M. Yamashiro 469

Calculation of whole blood CO_2 content
A. R. Douglas, N. L. Jones, and J. W. Reed 473

Cutaneous laser-Doppler flowmetry: influence of underlying muscle blood flow
J. L. Saumet, D. L. Kellogg, Jr., W. F. Taylor, and J. M. Johnson 478

RAPID COMMUNICATIONS

Independence of brain and tympanic temperatures in an unanesthetized human
K. Shiraki, S. Sagawa, F. Tajima, A. Yokota, M. Hashimoto, and G. L. Brengelmann 482

Carbohydrate metabolism in human skeletal muscle during exercise is not regulated by G-1,6-P_2
A. Katz, K. Sahlin, and J. Henriksson 487

LETTERS TO THE EDITOR

Is glycogen depletion related to muscular activity?
M. D. Delp and R. B. Armstrong; J. C. McDermott, G. C. B. Elder, and A. Bonen 490

ABSTRACTS FROM CURRENT LITERATURE

No. 2. AUGUST 1988

EDITORIAL

A new journal
P. C. Johnson 507

BRIEF REVIEW

Regulation of lactic acid production during exercise
A. Katz and K. Sahlin 509

Effect of exercise hemoconcentration and hyperosmolality on exercise responses
S. M. Fortney, N. B. Vroman, W. S. Beckett, S. Permutt, and N. D. LaFrance 519

Changes in plasma volume during bed rest: effects of menstrual cycle and estrogen administration
S. M. Fortney, W. S. Beckett, A. J. Carpenter, J. Davis, H. Drew, N. D. LaFrance, J. A. Rock, C. G. Tankersley, and N. B. Vroman 525

Cardiorespiratory responses to HCl vs. lactic acid infusion
H. W. Shirer, D. F. Erichsen, and J. A. Orr 534

External mechanical loading in conscious humans: role of upper airway mechanoreceptors
D. E. O'Donnell, R. Sanii, and M. Younes 541

Lipoprotein lipase in adipose tissues of rats running during cold exposure
Y. Deshaies, J. Arnold, and D. Richard 549

CONTENTS OF VOLUME 65

Pleural and extrapleural interstitial liquid pressure measured by cannulas and micropipettes
G. Miserocchi, S. Kelly, and D. Negrini 555

Influence of phasic afferent information on phrenic neural output during hypercapnia
A. S. Menon, S. J. England, E. Vallieres, A. S. Rebuck, and A. S. Slutsky 563

Short-term entrainment of ventilation to the walking cycle in humans
A. R. Hill, J. M. Adams, B. E. Parker, and D. F. Rochester 570

Body composition response to exogenous GH during training in highly conditioned adults
D. M. Crist, G. T. Peake, P. A. Egan, and D. L. Waters 579

Alveolar liquid and protein clearance from normal dog lungs
Y. Berthiaume, V. C. Broaddus, M. A. Gropper, T. Tanita, and M. A. Matthay 585

Characterization of muscarinic receptor subtypes on human peripheral lung
T. B. Casale and P. Ecklund 594

Effect of flow on O_2 consumption during progressive hypoxemia
G. Gutierrez, R. J. Pohil, and R. Strong 601

Bioenergetics of rabbit skeletal muscle during hypoxemia and ischemia
G. Gutierrez, R. J. Pohil, J. M. Andry, R. Strong, and P. Narayana 608

Effects of coronary ischemia on lung fluid balance in conscious sheep
T. Toyofuku, T. Kobayashi, K. Kubo, S. Koyama, and S. Kusama 617

Endurance training in dogs increases vascular responsiveness to an α_1-agonist
J. M. Evans, J. N. Funk, J. B. Charles, D. C. Randall, and C. F. Knapp 625

Responses of pulmonary vagal mechanoreceptors to high-frequency oscillatory ventilation
J. A. Wozniak, P. W. Davenport, and P. C. Kosch 633

Pulmonary epithelial sieving of small solutes in rat lungs
R. M. Effros, G. R. Mason, K. Sietsema, J. Hukkanen, and P. Silverman 640

Relationship among EMG and contractile responses of the diaphragm elicited by hypotension
S. N. A. Hussain, J. E. Marcotte, H. Burnet, P. Collett, and C. Roussos 649

Prediction of $\dot{V}O_{2\ max}$ during cycle exercise in pregnant women
S. P. Sady, M. W. Carpenter, M. A. Sady, B. Haydon, B. Hoegsberg, E. M. Cullinane, P. D. Thompson, and D. R. Coustan 657

Effects of increased pulmonary vascular tone on gas exchange in canine oleic acid pulmonary edema
M. Leeman, P. Lejeune, R. Hallemans, C. Mélot, and R. Naeije 662

Noninvasive diffusing capacity and cardiac output in exercising dogs
J. I. Carlin, S. S. Cassidy, U. Rajagopal, P. S. Clifford, and R. L. Johnson, Jr. 669

Diaphragmatic relaxation rate after voluntary contractions and uni- and bilateral phrenic stimulation
P. G. Wilcox, A. Eisen, B. J. Wiggs, and R. L. Pardy 675

The carotenoid crocetin enhances pulmonary oxygenation
G. M. Holloway and J. L. Gainer 683

α_1-Adrenergic-induced airway obstruction in ponies with recurrent pulmonary disease
J. S. Scott, H. Garon, R. V. Broadstone, F. J. Derksen, and N. E. Robinson 687

Site-specific adipose tissue LPL responses to endurance training in female lean Zucker rats
R. Savard and M. R. C. Greenwood 693

Inhibition of cholinergic neurotransmission in human airways by β_2-adrenoceptors
K. J. Rhoden, L. A. Meldrum, and P. J. Barnes 700

Polymorphonuclear leukocyte cytoplasts mediate acute lung injury
V. B. Antony, C. L. Owen, and D. English 706

Ventilatory responses to increased blood flow and decreased lung volume in awake dogs
E. Chow, E. J. Cha, and S. M. Yamashiro 714

Airway epithelium modulates the responsiveness of porcine bronchial smooth muscle
K. Stuart-Smith and P. M. Vanhoutte 721

CONTENTS OF VOLUME 65

Accelerated decay of inspiratory pressure during hypercapnic endurance trials in humans
B. T. Ameredes and T. L. Clanton 728

CO_2 sensitivity of cat phrenic neurogram during hypoxic respiratory depression
J. E. Melton, J. A. Neubauer, and N. H. Edelman 736

Stimulatory role for endogenous opioid peptides on postexercise insulin secretion in rats
P. A. Farrell, B. Sonne, K. Mikines, and H. Galbo 744

Perfusion distribution and lung thermal volume in canine hydrochloric acid aspiration
P. V. Carlile, S. F. Hagan, and B. A. Gray 750

Influence of inspiratory flow rate and frequency on O_2 cost of resistive breathing in humans
D. S. Dodd, P. W. Collett, and L. A. Engel 760

Specific reaginic antibody IgG_1-induced changes of airway smooth muscle cells
M. Souhrada and J. F. Souhrada 767

Blood-brain barrier to hydrogen ion during acute metabolic acidosis in piglets
L. C. Wagerle, S. P. Kumar, J. Belik, and M. Delivoria-Papadopoulos 776

Activity-induced adaptations in skeletal muscles of iron-deficient rabbits
W. R. Harlan and R. S. Williams 782

Ventilatory response to CO_2 and O_2 near eupnea in awake dogs
W. W. Hwang, S. M. Yamashiro, D. Sedlock, and F. S. Grodins 788

Rat lung antioxidant enzyme activities and their specific proteins during hyperoxia
L. S. Crouch, R. A. Prough, K. A. Kennedy, J. B. Snyder, and J. B. Warshaw 797

Influence of skeletal muscle glycogen on passive rewarming after hypothermia
P. D. Neufer, A. J. Young, M. N. Sawka, and S. R. Muza 805

Effect of physical training on peripheral sweat production
M. J. Buono and N. T. Sjoholm 811

Limitation of maximal O_2 uptake and performance by acute hypoxia in dog muscle in situ
M. C. Hogan, J. Roca, P. D. Wagner, and J. B. West 815

Relationship between maximal expiratory flows and lung volumes in growing humans
T. R. Martin, H. A. Feldman, J. J. Fredberg, R. G. Castile, J. Mead, and M. E. B. Wohl 822

Tracheal mucosal blood flow responses to autonomic agonists
J. A. Barker, A. D. Chediak, H. J. Baier, and A. Wanner 829

Antiproteinases protect cultured lung endothelial cells from endotoxin injury
J. Tumen, B. Meyrick, L. Berry, Jr., and K. L. Brigham 835

Effect of exercise training on glucose homeostasis in normal and insulin-deficient diabetic rats
L. J. Goodyear, M. F. Hirshman, S. M. Knutson, E. D. Horton, and E. S. Horton 844

Relative strengths of the chest wall muscles
M. B. Hershenson, Y. Kikuchi, and S. H. Loring 852

Effect of tracheal smooth muscle tone on collapsibility of immature airways
R. B. Penn, M. R. Wolfson, and T. H. Shaffer 863

Nasal and tracheal responses to chemical and somatic afferent stimulation in anesthetized cats
K. P. Strohl, M. P. Norcia, A. D. Wolin, M. A. Haxhiu, E. van Lunteren, and E. C. Deal, Jr. 870

Direct effects of CO on cerebral energy metabolism in bloodless rats
C. A. Piantadosi, P. A. Lee, and A. L. Sylvia 878

Inspiratory pressure generation: comparison of subjects with COPD and age-matched normals
S. Levine, M. Gillen, P. Weiser, G. Feiss, M. Goldman, and D. Henson 888

Metabolic responses to exercise in young and older athletes and sedentary men
J. M. Hagberg, D. R. Seals, J. E. Yerg, J. Gavin, R. Gingerich, B. Premachandra, and J. O. Holloszy 900

Glucose transport into rat skeletal muscle: interaction between exercise and insulin
H. Wallberg-Henriksson, S. H. Constable, D. A. Young, and J. O. Holloszy 909

Role of platelets in contraction of canine tracheal muscle elicited by PAF in vitro
K. J. Popovich, G. Sheldon, M. Mack, N. M. Munoz, P. Denberg, J. Blake, S. R. White, and A. R. Leff 914

Effects of altered CSF [H^+] on ventilatory responses to exercise in the awake goat
C. A. Smith, L. C. Jameson, and J. A. Dempsey 921

Density dependence of respiratory input and transfer impedances in humans
M. Rotger, R. Peslin, C. Duvivier, D. Navajas, and C. Gallina 928

Bronchoconstriction elicited by isocapnic hyperpnea in guinea pigs
D. W. Ray, C. Hernandez, N. Munoz, A. R. Leff, and J. Solway 934

SPECIAL COMMUNICATIONS

Plasma norepinephrine and muscle sympathetic discharge during rhythmic exercise in humans
D. R. Seals, R. G. Victor, and A. L. Mark 940

A digital system for generating dynamic sinusoidal gas concentration signals
S. A. Barton, L. Sutton, C. E. W. Hahn, and A. M. S. Black 945

Skeletal muscle enlargement with weight-lifting exercise by rats
T. S. Wong and F. W. Booth 950

Mass spectrometry for monitoring respiratory and anesthetic gas waveforms in rats
D. R. Larach, H. G. Schuler, T. M. Skeehan, and J. A. Derr 955

Measurements of metabolic rate in rats: a comparison of techniques
T. I. Musch, A. Bruno, G. E. Bradford, A. Vayonis, and R. L. Moore 964

Stimulation of ciliary beat frequency by autonomic agonists: in vivo
L. B. Wong, I. F. Miller, and D. B. Yeates 971

RAPID COMMUNICATIONS

Identification of surfactant proteolipid SP-B in human surfactant and fetal lung
T. E. Weaver, V. K. Sarin, N. Sawtell, W. M. Hull, and J. A. Whitsett 982

O_2 content of blood sampled from different venous compartments of the rat
T. I. Musch and D. R. Larach 988

ABSTRACTS FROM CURRENT LITERATURE 992

No. 3. SEPTEMBER 1988

EDITORIAL

Gaudaemus igitur
A. P. Fishman 1005

BRIEF REVIEW

Afferent neural pathways in cough and reflex bronchoconstriction
J.-A. Karlsson, G. Sant'Ambrogio, and J. Widdicombe 1007

Ibuprofen reduces the progression of permeability edema in an animal model of hyperdynamic sepsis
A. G. Gnidec, W. J. Sibbald, H. Cheung, and C. A. Metz 1024

Importance of vagal afferents in determining ventilation in newborn rats
L. Fedorko, E. N. Kelly, and S. J. England 1033

Comparison of diaphragmatic fatigue in newborn and older rabbits
P. N. Le Souëf, S. J. England, H. A. F. Stogryn, and A. C. Bryan 1040

Induced lactacidemia does not affect postexercise O_2 consumption
D. A. Roth, W. C. Stanley, and G. A. Brooks 1045

Depression of hypoxic ventilatory response in humans by somatostatin
R. B. Filuk, D. J. Berezanski, and N. R. Anthonisen 1050

CONTENTS OF VOLUME 65

Mechanism of improvement in pulmonary gas exchange during growth in awake piglets
P. J. L. Escourrou, B. P. Teisseire, R. A. Herigault, M. O. Vallez, A. J. Dupeyrat, and C. Gaultier 1055

Nedocromil sodium in allergen-induced bronchial responses and airway hyperresponsiveness in allergic sheep
W. M. Abraham, J. S. Stevenson, M. Eldridge, R. Garrido, and L. Nieves 1062

Respiratory reflex responses to stimulation of tracheal mucosa in enflurane-anesthetized humans
T. Nishino, K. Hiraga, T. Mizuguchi, and Y. Honda 1069

Effects of ischemia on $\dot{V}O_2$, tension, and vascular resistance in contracting canine skeletal muscle
M. W. Gorman, J. K. Barclay, and H. V. Sparks 1075

Methylcholine-activated eccrine sweat gland density and output as a function of age
W. L. Kenney and S. R. Fowler 1082

Effect of stimulation of pulmonary C-fiber receptors on canine respiratory muscles
M. A. Haxhiu, E. van Lunteren, E. C. Deal, and N. S. Cherniack 1087

Direct measurement of static chest wall compliance in animal and human neonates
G. M. Davis, A. L. Coates, A. Papageorgiou, and M. A. Bureau 1093

Central respiratory effects of glutamine synthesis inhibition in dogs
B. Hoop, D. M. Systrom, V. E. Shih, and H. Kazemi 1099

Temperature profiles with respect to inhomogeneity and geometry of the human body
J. Werner and M. Buse 1110

Acute transient SO_2-induced airway hyperreactivity: effects of nedocromil sodium
D. M. Jackson and R. P. Eady 1119

Effect of inhaled and systemic opiates on responses to inhaled capsaicin in humans
R. W. Fuller, J.-A. Karlsson, N. B. Choudry, and N. B. Pride 1125

Measurement of bronchial blood flow with radioactive microspheres in awake sheep
C.-H. Wu, D. C. Lindsey, D. L. Traber, C. E. Cross, D. N. Herndon, and G. C. Kramer 1131

Increase in pulmonary capillary permeability in dogs exposed to 100% O_2
F. Royer, D. J. Martin, G. Benchetrit, and F. A. Grimbert 1140

Role of muscle loss in the age-associated reduction in $\dot{V}O_{2\ max}$
J. L. Fleg and E. G. Lakatta 1147

Carotid body control of bronchial circulation in sheep
M. Alsberge, M. Magno, and M. Lipschutz 1152

Effect of 100% O_2 on hypoxic eucapnic ventilation
S. G. Holtby, D. J. Berezanski, and N. R. Anthonisen 1157

Experimental respiratory decompression sickness in sheep
C. E. Atkins, C. E. Lehner, K. A. Beck, R. R. Dubielzig, E. V. Nordheim, and E. H. Lanphier 1163

Lung hyperinflation in isolated dog lungs during high-frequency oscillation
E. J. Cha, E. Chow, H. K. Chang, and S. M. Yamashiro 1172

Distribution of pulmonary vascular resistance in experimental fibrosis
R. P. Michel, T. S. Hakim, and C. R. Freeman 1180

Changes in fiber composition of soleus muscle during rat hindlimb suspension
G. H. Templeton, H. L. Sweeney, B. F. Timson, M. Padalino, and G. A. Dudenhoeffer 1191

Changes in compartmental ventilation in association with eye movements during REM sleep
R. P. Millman, H. Knight, L. R. Kline, E. T. Shore, D.-C. C. Chung, and A. I. Pack 1196

Mucus transport by high-frequency nonsymmetrical oscillatory airflow
H. K. Chang, M. E. Weber, and M. King 1203

Catalase prevents prostanoid release and lung lipid peroxidation after endotoxemia in sheep
A. Seekamp, C. Lalonde, D. Zhu, and R. Demling 1210

Erythrocyte transit and neutrophil concentration in the dog lung
J. C. Hogg, T. McLean, B. A. Martin, and B. Wiggs 1217

Baroreceptor-mediated suppression of osmotically stimulated vasopressin in normal humans
S. R. Goldsmith 1226

Periodic weight support effects on rat soleus fibers after hindlimb suspension
E. O. Hauschka, R. R. Roy, and V. R. Edgerton 1231

Release of epithelium-derived relaxing factor after ozone inhalation in dogs
G. L. Jones, C. G. Lane, E. E. Daniel, and P. M. O'Byrne 1238

Mechanism of reduced LV afterload by systolic and diastolic positive pleural pressure
H. E. Fessler, R. G. Brower, R. A. Wise, and S. Permutt 1244

Characterization of β-adrenergic receptors in cultured human and bovine endothelial cells
R. E. Howell, S. M. Albelda, M. L. Daise, and E. M. Levine 1251

Human platelets attenuate oxidant injury in isolated rabbit lungs
J. E. Heffner, S. A. Katz, P. V. Halushka, and J. A. Cook 1258

Effect of regional pulmonary blood flow on extravascular lung water measurements with PET
M. Velazquez and D. P. Schuster 1267

Collapse of intercellular spaces of canine tracheal mucosa by epinephrine
F. J. Al-Bazzaz, J. Veech, and D. Arenberg 1274

Measurement of alveolar gas volume by ambient pressure changes in isolated lungs
R. R. Martin, R. Peslin, C. Duvivier, and C. Gallina 1281

Pleural pressure between diaphragm and rib cage during inspiratory muscle activity
P. T. Macklem, L. Zocchi, and E. Agostoni 1286

Transdiaphragmatic pressure and rib motion in area of apposition during paralysis

F. S. Apple and M. Rhodes 2598

Carbohydrate balance in competitive runners during successive days of intense training
J. P. Kirwan, D. L. Costill, J. B. Mitchell, J. A. Houmard, M. G. Flynn, W. J. Fink, and J. D. Beltz 2601

Hypoxia increases glutathione redox cycle and protects rat lungs against oxidants
C. W. White, J. H. Jackson, I. F. McMurtry, and J. E. Repine 2607

Pulmonary vascular reactivity in hyperoxic pulmonary hypertension in the rat
R. G. Gore and R. Jones 2617

Effects of platelet-activating factor antagonist SRI 63-441 on endotoxemia in sheep
C. N. Sessler, F. L. Glauser, D. Davis, and A. A. Fowler III 2624

Pulmonary hypertension and pulmonary vascular reactivity in beagles at high altitude
R. F. Grover, R. L. Johnson, Jr., R. G. McCullough, R. E. McCullough, S. E. Hofmeister, W. B. Campbell, and R. C. Reynolds 2632

Cardiopulmonary resuscitation in the rat
I. von Planta, M. H. Weil, M. von Planta, J. Bisera, S. Bruno, R. J. Gazmuri, and E. C. Rackow 2641

Interpretation of the krypton-81m dynamic series: the distribution of a tidal breath
B. E. Shykoff, L. Cinotti, M. Meignan, A. Harf, and H. K. Chang 2648

Abdominal muscle activity during speech production
J. D. Hoit, B. L. Plassman, R. W. Lansing, and T. J. Hixon 2656

Oxygen uptake kinetics during exercise in diabetic neuropathy
C. B. Kremser, N. S. Levitt, K. M. Borow, J. B. Jaspan, C. Lindbloom, K. S. Polonsky, and A. R. Leff 2665

Type II pneumocyte changes during hyperoxic lung injury and recovery
B. A. Holm, S. Matalon, J. N. Finkelstein, and R. H. Notter 2672

Methacholine-induced bronchoconstriction in dogs: effects of lung volume and O_3 exposure
S. T. Kariya, S. A. Shore, W. A. Skornik, K. Anderson, R. H. Ingram, Jr., and J. M. Drazen 2679

Coexistence of twitch potentiation and tetanic force decline in rat hindlimb muscle
L. L. Rankin, R. M. Enoka, K. A. Volz, and D. G. Stuart 2687

Maximal aerobic capacity at several ambient concentrations of CO at several altitudes
S. M. Horvath, J. F. Bedi, J. A. Wagner, and J. Agnew 2696

Effect of occluded venous return on core temperature during cold water immersion
K. D. Mittleman and I. B. Mekjavić 2709

Respiratory enthalpy changes in mine rescue workers exercising under heat stress
J. Leigh, R. K. S. Griffits, and C. G. Ellis 2714

Effects of atropine in ponies with recurrent airway obstruction
R. V. Broadstone, J. S. Scott, F. J. Derksen, and N. E. Robinson 2720

Targeted resistive ventilatory muscle training in chronic obstructive pulmonary disease
M. J. Belman and R. Shadmehr 2726

CO_2 and bicarbonate exchange in the rat liver
B. Lipsen and R. M. Effros 2736

Airway responsiveness to inhaled and intravenous carbachol in sheep: effect of airway mucus
C. S. Kim, M. A. Eldridge, and A. Wanner 2744

SPECIAL COMMUNICATIONS

Effect of aortic arterial catheterization on tissue glycogen content
R. L. Moore, M. R. Hilty, and T. I. Musch 2752

LETTERS TO THE EDITOR

Breathing response of the fetal sheep to CO_2
H. Rigatto; A. H. Jansen 2757
